

Mashfiq Rayhan Ovi

mashfiq.rayhan.ovi@gmail.com | GitHub | LinkedIn | +8801764321053 | UTC+6 (Available for EU/US overlap)

Summary

Results-driven Software Engineer specializing in **Node.js**, **React**, and **Next.js**, delivering scalable backend and frontend systems for distributed products. Architected high-impact solutions including a MikroTik Hotspot platform reducing ISP operational overhead by **50%**. Experienced in building production systems with performance, reliability, and developer efficiency at scale.

Remote Work Readiness

- Fully remote-ready: dedicated workstation, stable high-speed connection.
- Comfortable with async workflows, Agile/Scrum, and distributed teams.
- Available for overlap with EU/US time zones.
- Experienced with Jira, Slack, GitHub, CI/CD, Docker, and cloud environments.

Experience

Software Engineer, GeekyCloud

Sept 2022 – Present

- Designed and built **Navigator**, a Hotspot management system for MikroTik routers, serving **500+ daily active users**.
- Architected scalable, maintainable components reducing ISP operational overhead by over **50%**.
- **Next.js** responsive portal - phone-based authentication, dynamic theming, and onboarding UI making it at least **30%** faster.
- Built **Mikronode**, an Express.js API integrating directly with RouterOS for real-time device communication.

Full Stack Engineer, ApexDV (Remote)

Apr 2022 – Sep 2022

- Developed and shipped frontend experiences using **React** and **Next.js**, improving UX and reducing load times by **25%**.
- Built reusable UI components enabling rapid feature rollout across multiple product teams.
- Integrated secure Web3 authentication and wallet flows for blockchain-ready interfaces.

Software Engineer, GeekyCloud

Jan 2021 – Mar 2022

- Built backend and admin systems for **CinePlex.live**, a streaming platform powered by TMDB API.
- Delivered REST APIs and responsive UIs using **React**, **Next.js**, and **MongoDB**.

Intern Engineer, GeekyCloud

Oct 2020 – Jan 2021

- Contributed core modules to the **CinePlex.live** MVP, supporting initial launch.

Projects

- **Navigator**: Navigator MVP is a full-stack **HotSpot management system** designed for **MikroTik routers**.
- **InfoSysCS**: AI-Powered **Qualitative Data Analysis Assistant** for research workflows.
- **CinePlex.live**: Web-based movie streaming platform powered by **TMDB API**.
- **Quadro**: Modern SaaS platform to help businesses digitize operations.
- **ApexDV**: Modular startup landing page template for web3 App projects.
- **Apexdv-nft**: UI for NFT minting in the Apexdv project ecosystem.
- **Others**: Please Visit **GitHub**

Skills

- Languages: **JavaScript**, **TypeScript**, Python
- Frontend: **React**, **Next.js**, Tailwind
- Backend: **Node.js**, **Express.js**
- Databases: **PostgreSQL**, **MySQL**, **MongoDB**
- ORM: **Prisma**, Sequelize, Mongoose
- Tools: **Git**, **Docker**, CI/CD
- Others: Jira, Slack, Vercel, Linux/WSL
- Core Strengths: APIs, system design fundamentals, scalable architectures

Education

BSc in Computer Science and Engineering
North South University, Dhaka

HSC: Govt. M. M. City College, Khulna
SSC: Khulna Zilla School
